DETAILED ACTION

Response to Amendment

1. Examiner acknowledges the cancellation of claims 16-27 cited in Amendment B dated 3-11-03. Claims 1-15 have been examined on their merits.

Double Patenting

2. Claim 13 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 14. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

The specification on page 5, lines 19-24, state that an electric device is a cell obtained by linking a positive electrode and a negative electrode through a polymeric electrolyte. If this claim is not directed to a cell then there could be a possible restriction involved.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 1745

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

4. Claims 1, 4, 6-10, 12-14 are rejected under 35 U.S.C. 102(a) as being anticipated by Takeda et al. (JP 2000-173343, abstract).

Takeda et al. teaches an ion conductive high polymer electrolyte composed of a lithium salt of the organic boron complex compound expressed as Formula A and the organic high polymer having polyether segment in a main chain or a side chain.

Allowable Subject Matter

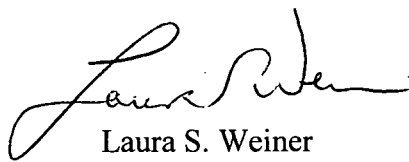

5. Claims 2-3, 5, 11, 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
